

Logicon Caries Detector Software Testimonials

Logicon Caries Detector Software Testimonial from Dr. Robert Pauley:

"I especially enjoy using the RVG 6100 System in conjunction with the Logicon Caries Detector Software for cavity detection and patient education."

Logicon Caries Detector Software Testimonial from Dr. Bradley Dykstra:

"Logicon Caries Detector Software is truly amazing. Diagnosing interproximal caries is a combination of both an art and a science, and Logicon adds a lot more science to this diagnostic mix by giving you hard data. I can predictably diagnose caries at an earlier stage and treat with minimal loss of tooth structure. Even more importantly, it keeps me from cutting into teeth where the decay is not yet into the dentin. Logicon is an extra set of eyes."

Logicon Caries Detector Software Testimonial from Dr. Jonathan Golab:

"The most impressive feature is Logicon Caries Detector Software. This software rocks and to not purchase it is a huge mistake. It is incredible. You can scan suspicious lesions with it, and it will blow you away at how it finds decay and upon preparation of the tooth, it is confirmed every single time. I enclosed my photos of a traditional radiography bitewing of tooth #3. It showed no decay. Then, at the patient's next visit, we had Logicon Software, and the image clearly showed massive decay. The patient had no discomfort with that tooth, but proceeded after seeing the image and the confirmation with Logicon Software. Upon preparation, extensive decay was noted and confirmed."
