

CS SoftDent Cloud

Product Summary

CS SoftDent Cloud is the powerful practice management solution designed for offices that want to avoid making difficult and costly decisions about servers and computer hardware upgrades. Building on nearly 30 years of CS SoftDent practice management software, CS SoftDent Cloud offers a full suite of tools to increase productivity and streamline daily workflow, such as insurance benefits tracking, electronic patient charts and detailed financial reports, at any time. CS SoftDent Cloud offers a centralized platform practitioners can access from any location.

Product Features and User Benefits

Imaging that's Anything but Basic: Now, practitioners can benefit from the features and full imaging capabilities of Carestream Dental's dental imaging software—all within the cloud. Thanks to real time synchronization, images are immediately available, from any location, as soon as they are uploaded into the patient's chart. What's more, practitioners are able to access the actual images—rather than compressed files—for enhanced viewing and diagnoses.

Data Security Made Simple: CS SoftDent Cloud includes secure, offsite and HIPAA-compliant storage for all sensitive patient and practice management data. Data is backed up and protected by Carestream Dental, the most trusted name in oral health solutions. Practitioners can leave the IT and sophisticated computing infrastructure to Carestream Dental so they can focus on their patients and practices.

Practice Administration Simplified: CS SoftDent Cloud acts as the administrative arm of oral health practices with features like Practice Central. With custom views, Practice Central delivers easy access to patient information and critical projects, allowing teams at multiple locations to quickly handle tasks with just a few clicks. Not to mention that practitioners can harness the power of CS SoftDent without the complexity of maintaining a computing infrastructure, yet another way to simplify workflow.

Financial Management and Insurance Tracking: CS SoftDent Cloud acts as a practice's accountant, offering financial and insurance tracking features that enable a practice to meet its bottom line. Practices can stay on top of billing with detailed financial reports that can be run automatically on a daily, weekly or monthly basis. Goal Tracking offers practices the ability to examine everyone's monthly progress from a simple, at-a-glance display, so they know how much revenue they can expect.

Insurance tracking is made easy with the insurance and benefit tracking capability, which instantly estimates billing amounts for PPO, DMO, indemnity plans and uninsured patients. For added security, CS SoftDent Cloud allows users to password protect financial matters through enhanced security features.

Improved Case Acceptance: With Case Presentation, patients are given the information needed to make better treatment choices. Case Presentation combines standard educational slides with clinical images to create a persuasive demonstration – leading to better case acceptance.

eServices* Integration: CS SoftDent Cloud fully integrates with Carestream Dental's suite of eServices to customize your practice management solution for practitioners' specific needs. Simplifying and automating the electronic billing process, eServices can save the practice money, speed up reimbursements and reduce clerical errors. With secure and reliable data recovery, eServices protects practices' data in the event of a hardware or system failure. Additionally, eServices can help manage patient communication with customizable appointment reminders that can be sent via voicemail, email and/or text message.

**Optional add-on feature*
