

Partner Fact Sheet

Overview

Carestream Dental is committed to providing humanized technology solutions that help oral and maxillofacial surgical practices improve diagnostic excellence and workflow efficiency. These new partners share Carestream Dental's dedication to quality and offer exceptional value to dental practitioners.

Lexicomp

Carestream Dental has executed a comprehensive data-sharing agreement with Lexicomp, Inc., a global provider of drug information and drug data solutions for healthcare professionals. Lexicomp helps the dental team make faster, safer decisions with dental-specific clinical information.

In addition to integrating with the Lexicomp Online Dentistry resource, the partnership makes it possible to use existing practice management software to seamlessly access and import Lexicomp data into patient records, streamlining workflow and eliminating a lengthy data entry process. Lexicomp's in-house clinical team constantly monitors announcements by the U.S. Food and Drug Administration and pharmaceutical manufacturers for changes to drug availability; new dosage forms; and revisions to contraindications, warnings or other changes.

PBHS

iConsult is the ultimate digital assistant for the oral surgeon, facilitating chair-side treatment planning and increasing case acceptance. PBHS is releasing iConsult v3.0, which will soon offer two-way integration with CS WinOMS Practice Management Software, at AAOMS 2012. With iConsult v3.0, the entire consultation, including all images, documents, informed consents, forms, notes, diagrams and audio files are automatically synced and integrated back into your patient's CS WinOMS account.

Designed to enhance patient consultations, this latest release includes over 100 new educational animations and slides, as well as integrated OMSNIC informed consent videos, customer or preinstalled OMSNIC consent forms and new technology that secures the patient's electronic signature. It also incorporates custom digital forms and consult notes, medical voice dictation and note taking, and a patient portal for secure viewing of personalized treatment plans.

Amazing Charts EHR

The Amazing Charts Electronic Health Record (EHR) is a top-ranked all-in-one EHR solution that has been certified for meaningful use and includes the Meaningful Use Wizard that simplifies report creation to complete the attestation process. Amazing Charts has been top ranked in multiple studies for its ease of use and intuitive interface, as well as its affordability.

Amazing Charts allows you to completely document any patient encounter quickly and efficiently, providing rapid documentation of patient visits and calls. The software

incorporates charting, e-Prescribing and scheduling, as well as decision support tools that are concise, practical and evidence-based.

OMS3

OMS3 uses data from CS WinOMS to provide numerous customizable dashboards to visualize a practice's key productivity indicators for referrals, collections, provider performance, marketing, procedure code analysis and office performance. OMS3 helps practitioners understand the data which includes year over year trend and data analysis by market and production type.
