

CS OrthoTrac Cloud Testimonial

"I purchased my practice from a retiring orthodontist in August 2013 that used the older version of CS OrthoTrac software. In January 2014, our computer crashed. We tried to get the information off of our backup discs, but it turned out that two of the discs were corrupted and we lost all of our data. I had an idea that this might happen eventually, so I had my office manager print out the financial reports for all patients to ensure we had financial data we could salvage were something to go wrong.

I didn't want to purchase new high-end computers and servers for the office, so we decided to go with CS OrthoTrac Cloud because it was the most economical option. The training was excellent! Terry was our trainer, and she did a fantastic job. I'm happy that it's on the cloud and that I can access that information anywhere, anytime. I can access it from home, I have it on my laptop. I like that I can write letters and have my office manager print them in the office and then send them out. The cloud has been a great help in facilitating communication.

Support for OrthoTrac Cloud has been really great. Every time we call, we get our questions answered in a timely manner. I would recommend OrthoTrac Cloud to other orthodontists. For access purposes, it's just easier to get to your patient files. And I think that, overall, it's more cost effective.+
