

David Roudergues

*Director, Dental Equipment, US&C
Product Line Manager
Carestream Dental*

David Roudergues serves as the director of dental equipment in the United States and Canada. He has worked in the dental industry since 1991.

Roudergues oversaw the launches of the CS 9000 3D extraoral imaging system; the CS 9300 and CS 9300 Select 3D and panoramic systems; and the CS 8100 panoramic system. He was also involved in the design of the CS 8100 3D before becoming director of equipment, product line manager, in early 2014. He now manages the equipment portfolio, including CS Solutions, for the United States and Canada.

Prior to joining Carestream Dental, Roudergues served as global product line manager at Trophy Radiologie—which became a part of Carestream Dental in 2002—for all its imaging products, such as RVG sensors, software and extraoral digital solutions.

Roudergues' foray into the dental industry was as the export manager at Gallus, a French manufacturer of dental chairs. At the time, the company was integrating the first RVG sensors from Trophy with its products under the leadership of Dr. Francis Mouyen, the inventor of RVG technology and owner of Gallus.

Roudergues has a background in computer science and holds an Executive Master of Business Administration.
