

CS 1500 Testimonials

CS 1500 Testimonial from Dr. James Ferington:

"The CS 1500 camera gives me the capability to taking wonderful full-face pictures; right down to taking a very, very close view of a single tooth - a lesion, anything of question. Access is never a problem."

Dr. James Ferington
James E. Ferington, D.D.S.
Lockport, NY, USA

CS 1500 Testimonial from Dr. Catherine Myrick:

"The CS 1500 is a wonderful patient educator. They are more likely to understand their dental needs when seeing pictures of their teeth that they cannot see when looking at a mirror. It's great at showing cracks as well as decay and existing restorations."

Dr. Catherine Myrick
Clover Family Dentistry
Clover, SC, USA

CS 1500 Testimonial from Michelle Murphy :

"The patients have been very responsive to the CS 1500 - they love it. It is so easy to put it up and show them exactly what's wrong and also it's helped with other things as far as them being able to see things that we were telling them about as far as the color of their teeth and any areas of decay that they may not be able to notice on the X-ray. When they're pointed out on the X-ray the digital camera is key and given a whole new understanding to what we're doing and our treatment plan for the patients."
